

Zhengyue Shao

Software Engineer 2 · Microsoft

✉ 419396971@qq.com 🌐 szylover 🌐 lovebxy.net

Software Engineer with 8+ years at Microsoft, contributing to Android platform engineering, SDK/runtime design, voice assistants, AI meeting experiences, and AI product integration. Experienced in client-side feature work, host app integration, reliability improvements, and release support in cross-team projects.

📁 Experience

Microsoft

Software Engineer 2 | Jun 2017 – Present

M365 Copilot Mobile Runtime – OCM

2025 – Present

Contribute to the Android SDK for OneCopilotMobile, shared by host apps including OfficeMobile, Outlook, and Teams.

- Support day-to-day OCM Android SDK engineering: releases, host integration support, cross-module compatibility, ECS rollout approvals, and feature flag management.
- Contribute to Copilot runtime infrastructure across configuration, feature gates, GPT-5 model switching, rich response rendering, and realtime voice integration.
- Implement assigned product and compliance modules including quote context injection, compliant WebSocket routing, and image upload consent flow.

Outlook Android – Search & Compliance

2024 – 2025

Contributed to Outlook Android search experiences and security/compliance-related feature work.

- Outlook search module work: People, Files, and Events tab architecture, result rendering, and performance telemetry.
- Outlook Search page UX: custom search result rendering, search interactions, and page experience.
- Security and compliance modules: Intune enterprise policy checks, SafeLink integration, and resource access control fixes.

Teams MeetApp – AI Meeting Experience

2022 – 2024

Contributed to MeetApp in the Teams Windows Desktop React Native project, providing AI-enhanced meeting management experiences for Teams Desktop.

- Participated in MeetApp architecture design and feature development, including Graph/Substrate API clients, data pipeline, meeting list, Recap navigation, and AI summary features.
- Contributed to Copilot entry points and cross-meeting AI summaries, including BizChat streaming conversation flow.
- Helped build performance telemetry with Kusto/Augloop, debugging tools, and production investigations for issues such as memory leaks and navigation latency.

Voice Assistants and Conversational AI – Cortana / PME

2019 – 2022

Contributed to Android experiences for Play My Email, Catch Me Up, and Play My Messages.

- Contributed to Catch Me Up integration in Teams Android from POC to GA, covering React Native native bridge, Cortana voice interaction, KWS/AEC/TTS, and message triage actions.
- Developed streaming email readout and voice command handling in Outlook, with session reliability improvements for retry, network recovery, and state management.
- Participated in Hermes engine migration and SDX architecture refactoring, including support for Gov Cloud deployment.

SharePoint Online – Build Infrastructure

2017 – 2019

Worked on build system modernization for the large-scale SharePoint Online monorepo.

- Participated in migration from the legacy build system to Domino (BuildXL), improving incremental build workflows.
- Supported forward integration across branches and build break response as part of the DRI rotation.

Education

Zhejiang University 2014 – 2017

M.S. in Computer Science and Technology Research: mobile security and BYOD access control

Nanjing University of Aeronautics and Astronautics 2010 – 2014

B.S. in Computer Science and Technology Admitted through NOIP First Prize recommendation, 2009

Publications

- **RiskCog: Unobtrusive Real-Time User Authentication on Mobile Devices in the Wild**
T. Zhu, Z. Qu, H. Xu, J. Zhang, **Z. Shao** et al. *IEEE Transactions on Mobile Computing*, 2019 | **92 citations**
- **AppShield: Enabling Multi-entity Access Control Cross Platforms for Mobile App Management**
Z. Qu, G. Guo, **Z. Shao** et al. *SecureComm 2016* (Springer LNCS) | **11 citations**

Skills

Android Platform	Kotlin, Java, Jetpack Compose, Coroutines/Flow, Dagger/Hilt, OkHttp/WebSocket, Room, React Native
Architecture & SDK	MVVM, Clean Architecture, SDK/runtime design, modularization, dependency injection, host/plugin architecture, feature gates
AI Integration	Copilot integration, AI context pipeline, voice interaction (TTS/AEC/KWS), compliance UX, model switching
Engineering	Monorepo CI/CD, build systems, performance telemetry/Kusto, staged rollout, production incident response, cross-team collaboration
